VOCABULARY (第一集)

1. What brands or products do you like?

Generally speaking, I don't have a huge amount of **brand loyalty** and I **end up** buying things from all kinds of different shops and companies. Whenever I **make a big purchase**, I have a look at several options and shop around to find the best deal.

This isn't the case with smaller purchases, especially fast food. If I'm in an unfamiliar place I will usually **seek out** a McDonalds because you know what you're going to get – their burgers are the same everywhere. Sometimes I feel like I should be more **audacious** with my food choices, but it's **a bit of a minefield** when you **go off the beaten track** with fast food, there is **no guarantee of quality**.

I'm **a bit of a sucker** for trends too. If it suddenly becomes cool to wear Adidas trainers I'll go out and buy a pair! So I guess the type of clothes I like is always **in flux**, sometimes I look at clothes I used to wear a year ago and think 'what was I thinking? That's **hideous!**'

However, I do have some **weird hang-ups about** brands. For example, I never buy Apple products because I hate the **smug advertising** – I know iPads are good products, I just **have a mental block about** buying them!
